PART A. Grammar

Directions: Select the best answer choice (1), (2), (3), or (4) that best completes the blank in the following questions. Then mark your answer sheet.

- 1- The millipede nanodrive prototype operates like a tiny phonograph, using the sharp tips of minuscule silicon cantilevers _____.
 - 1) and reads a polymer medium through data inscribed
 - 2) reading data, and inscribing in a polymer medium
 - 3) by reading a polymer medium inscribed by data
 - 4) to read data inscribed in a polymer medium
- 2- Will the procedures used for fabricating electronic devices four decades down the road look _____?
 - 1) anything like those currently employed
 - 2) anything that is as current as is employed
 - 3) like anything is actually employed currently
 - 4) like those of or anything employed currently
- 3- The study of small vessel growth—a phenomenon referred to generally as angiogenesis—has such potential for providing new therapies _____ and has received enthusiastic interest from the pharmaceutical and biotechnology industries.
 - 1) that it has been the subject of countless news stories
 - 2) so countless news stories have as their subject
 - 3) the news stories of which are the subject
 - 4) subjected to countless news stories
- 4- Advances in golf balls, javelins, speed skates and tennis rackets have so improved performance that occasionally they have had to be regulated or banned _____ the fundamental human challenge that defines a game.
 - 1) not to be undermining
 - 2) so as not to undermine
 - 3) such that they not undermine
 - 4) so not much as they undermine
- 5- What _____ that human variation confounds the predictive validity of most sports psychology models.
 - 1) the ambiguous outcome of this scientific analysis tells us the fact
 - 2) fact the ambiguous outcome of this scientific analysis tells us
 - 3) the ambiguous outcome of this scientific analysis tells us is
 - 4) this ambiguous outcome and the scientific analysis tells us
- 6- The hikers climbed steadily in near darkness for over an hour, reaching the apex of the hill just in time _____.
 - 1) for themselves to get the reward of the sunrise so beautiful
 - 2) to be rewarded themselves with so beautiful a sunrise
 - 3) for the sunrise too beautiful to reward them all
 - 4) to be rewarded by the beautiful sunrise

7. **Affording strategic proximity to the Strait of Gibraltar, Morocco was also of interest to the French throughout the first half of the twentieth century because they assumed _____.**
- 1) without which, they could never be secure about their grip on Algeria
 - 2) never would their grip on Algeria be secure if they did not hold it
 - 3) if they did not hold it, their grip on Algeria was always insecure
 - 4) without it their grip on Algeria would never be secure
- 8- **Lawmakers have proposed legislation requiring _____ indefinitely or show just cause for dismissal.**
- 1) that all older workers be retained by employers
 - 2) the retaining by employers of all old workers
 - 3) employers' retention of all old workers
 - 4) employers to retain all old workers
- 9- **As rainfall began to decrease in the Southwest about the middle of the twelfth century, most of the Monument Valley Anasazi abandoned their homes to join other clans _____.**
- 1) where there was access to water that was less limited
 - 2) whose access to water was less limited
 - 3) where they were of less limited water access
 - 4) having less limitations to water access
- 10- **Spanning over more than 50 years, Friedrich _____ a Sanskrit scholar and culminated in virtually every honor that European governments and learned societies could bestow.**
- 1) Müller had begun his career with an unpromising apprenticeship of
 - 2) Müller's career began with an unpromising apprenticeship of being
 - 3) Müller's career began with an unpromising apprenticeship as
 - 4) Müller began his career in an unpromising apprenticeship of

PART B. Vocabulary

Directions: Select the best answer choice (1), (2), (3), or (4) that best completes the blank in the following questions. Then mark your answer sheet.

- 11- **The guest lecturer in Professor Zito's class, "Tupac Shakur and the Modern World," was so _____ that most of the students could barely follow his thesis, and some even walked out in the middle.**
- 1) bucolic
 - 2) ponderous
 - 3) bohemian
 - 4) dank
- 12- **The _____ hyenas devoured the remains of the wildebeest left by the lion.**
- 1) misshapen
 - 2) commonsensical
 - 3) smug
 - 4) ravenous
- 13- **"The Great Cham" is a _____ used variously for the Khan of the Tartary region in Asia and for the eighteenth-century writer and dictionary maker Samuel Johnson.**
- 1) sobriquet
 - 2) huckster
 - 3) beacon
 - 4) maniac
- 14- **Suggestions of inferiority have long _____ in a city where image has been an obsession for more than a century.**
- 1) resented
 - 2) disintegrated
 - 3) defalcated
 - 4) rankled

- 15- Slander and libel laws stand as a protection of an individual's reputation against irresponsible _____ of falsehood.
 1) denouement 2) denunciation 3) dissemination 4) diadem
- 16- I endeavored to make my newspaper both entertaining and useful, and it accordingly came to be in such demand, that I reaped considerable profit from it, _____ annually near ten thousand.
 1) vending 2) frequenting 3) trekking 4) reiterating
- 17- The Army Corps of Engineers distributed 26 million plastic bags throughout the region. Volunteers filled each bag with 35 pounds of sand and then stacked them to create levees, _____ barriers against the floodwaters.
 1) indeterminate 2) makeshift 3) jejune 4) lissome
- 18- Most natural hazards can be detected before their threat matures. But seisms (from the Greek *seismos*, earthquake) have no known _____, so they come without warning, like the vengeance of an ancient warrior.
 1) motifs 2) instigations 3) appellations 4) precursors
- 19- The concerto was too _____ and elaborate for the audience's taste, for they were expecting a much more simple piece.
 1) baroque 2) lachrymose 3) pervasive 4) vicarious
- 20- The child's interest _____ because she is fickle and not used to concentrating on one task at a time.
 1) blurs 2) evinces 3) wanes 4) distends
- 21- The reference, in Shakespeare's *Julius Caesar* to "the clock striking twelve" is _____, since there were no striking timepieces in ancient Rome.
 1) unorthodox 2) anachronistic 3) nostalgic 4) ineffable
- 22- The train crash was blamed on a switchman who was _____, having fallen asleep while on duty.
 1) captious 2) subversive 3) derelict 4) sallow
- 23- No politician in America today will openly _____ racism, although some behave and speak in racially prejudiced ways.
 1) espouse 2) blemish 3) eschew 4) articulate
- 24- The _____ character of the 1890s wore bright-colored spats and a top hat; in the 1980s, he wore fancy suspenders and a shirt with a contrasting collar.
 1) pedantic 2) titular 3) meek 4) foppish
- 25- The angry townspeople had begun a/an _____ bordering on downright revolution; they were collecting arms, holding secret meetings, and refusing to pay certain taxes.
 1) temerity 2) insurgency 3) protestation 4) interregnum
- 26- Witnessing this insolent command, I had to use all my stores of discipline to _____ a surge of _____ him.
 1) mollify reverence towards 2) shatter subjection to
 3) quash antipathy towards 4) belie proclivity for
- 27- For Dad, I found a device that _____ when calls are from telemarketers and automatically hangs up on them. Dad's love of gadgets is directly proportional to his animosity toward telemarketers, so the gift couldn't have been more _____.
 1) discerns felicitous 2) snivels.... surreptitious
 3) prattles gratuitous 4) dissents ceremonious

- 40- 1) was so helpless when possibly thwarted by a creature
 2) looked possible as being thwarted by a helpless creature
 3) could possibly be thwarted by a creature who looked so helpless
 4) so helpless as it looked was thwarted by a possibility a creature could imagine

PART D. Reading Comprehension

Directions: Read the following four passages and select the number of the answer choice (1), (2), (3), or (4) that best answers each question. Then mark your answer sheet.

Passage 1

For centuries oceanographers have snatched clues to ocean currents where they could. Early ideas about the speed and direction of currents often came from stray objects that floated and drifted for years —sealed bottles, rafts, the gloomy, waterlogged hulks of abandoned ships called derelicts. These days a host of ingenious instruments delivers intriguing news of the origins and routes of water. Perhaps the single most useful instrument for physical oceanographers is the CTD (conductivity-temperature-depth) recorder, which measures salinity and temperature of a particular mass of seawater at various depths. Identifying these properties is key to determining how, where, and when currents move.

- 41- As presented in the opening sentence, the task of the oceanographers is most similar to that of _____.
- 1) lawyers presenting a case to a jury
 - 2) investigators trying to solve a mystery
 - 3) researchers applying a new methodology
 - 4) explorers climbing a previously unscaled mountain
- 42- Lines 4-5 (“These days ... water”) serve primarily to _____.
- 1) offer a qualification
 - 2) suggest an option
 - 3) defend a position
 - 4) provide a transition

Passage 2

Many professional musicians receive conservatory training in order to become well-grounded in formal theory and instrumental technique; however, when we approach jazz we are entering quite a different sphere of training. Here it is more meaningful to speak of apprenticeship, ordeals, initiation ceremonies, and rebirth. For after the jazz musician has learned the fundamentals of an instrument and the standard techniques of jazz, such as intonations and traditional styles, the musicians must find his or her soul. All this through achieving that subtle identification between the instrument and the musician’s deepest drives, which will allow for the expression of each artist’s distinctive voice.

- 43- The word “which” in line 7 refers to _____.
- 1) identification
 - 2) instrument
 - 3) drives
 - 4) soul
- 44- Which generalization about jazz is most directly supported by the passage?
- 1) Its focus on formal training is excessive.
 - 2) It has been the source of much controversy.
 - 3) Its value is difficult to assess.
 - 4) It is a demanding process.

45- The last sentence (“All ... voice”) primarily emphasizes which point about jazz?

- 1) Jazz performances are comparable to paintings and sculptures.
- 2) Jazz is hard to define and varies greatly among performers.
- 3) Playing jazz is a highly personal and creative activity.
- 4) Listening to jazz has a clinically therapeutic value.

Passage 3

Do we all have the capacity for synaesthesia or is the brain’s ability to blend senses bestowed on a select few at birth? It now seems it could be a mixture of the two.

Synaesthesia seems to underpin some savants’ enhanced memory and numerical skills. The hope is that a better understanding of its origins could help to explain savant abilities – and perhaps even shine some light on whether we are all capable of attaining them.

The condition is thought to arise when extra connections in the brain cross between regions responsible for separate senses. To see if genes play a role in building or maintaining these connections, a team led by Julian Asher at the University of Oxford took genetic samples from 196 individuals from 43 families, 121 of whom exhibited auditory-visual synaesthesia, meaning they “see” sounds. “When I hear a violin, I see something like a rich red liquid,” says Asher, who is a synaesthete. “A cello is more like honey.”

From their analysis, the team were able to pin down four chromosomal regions where gene variations seemed to be linked to the condition. As one of the regions has also been associated with autism, there may be a common genetic mechanism underlying the two, says Asher.

So if we are genetically disposed to develop synaesthesia, does that rule out the possibility of inducing the experience? To find out, Roi Cohen Kadosh from Imperial College of London and colleagues hypnotized four volunteers so that they viewed numbers as having innate colors, known as grapheme-color synaesthesia. The volunteers then looked at a series of colored slides, some with a black digit in the centre and some without.

Like people with synaesthesia, roughly 80 per cent of the time the hypnotized volunteers failed to see the digits when the background color corresponded to the color they associated with a number. Controls who had not been placed under a trance, but were instructed to attach a color to each number, did not make this mistake .

“It shows that even without hyperconnectivity in the brain, you can still have synaesthesia,” says Cohen Kadosh. He says hypnosis may reactivate connections that had been suppressed by the brain.

Julia Simner from the University of Edinburgh, UK, has further evidence that synaesthesia is not the result of neural connections fixed before birth. She studied 615 6-to 7-year olds, eight of whom turned out to be grapheme-color synaesthetes. Over the course of a year, these children gradually associated more letters with colors, showing that the ability developed with time.

So should we all attempt to develop savant-like abilities? “Synaesthesia is strongly linked to improved memory capabilities so it would definitely be a good thing to research,” says Simner. Asher is more cautious, stressing that synaesthesia is often distracting, for example, while reading or listening to a lecture. He hopes to develop a genetic test to diagnose children and warn teachers of potential difficulties.

- 46- The primary purpose of the passage is to _____.**
- 1) explore the implications of a finding
 - 2) propose a temporary solution to a problem
 - 3) describe a phenomenon and shed light on what it can be ascribed to
 - 4) present two explanations of a phenomenon and reconcile the differences between them
- 47- All of the following are TRUE about Julian Asher and her team EXCEPT that _____.**
- 1) the hypothesis that they investigated was confirmed
 - 2) some of the subjects in their study were known to be possessed of synaesthesia
 - 3) they were trying to find out ways to help mediocre people perform as well as savants
 - 4) they suggest that a common genetic mechanism may be responsible for both autism and synaesthesia
- 48- What does the word "Controls" in line 23 refer to _____.**
- 1) people who have not been under a trance
 - 2) measures taken by investigators to ascertain the generalizability of their findings
 - 3) those technical devices that were used in the experiment to delete extraneous variables
 - 4) those 20 percent of the hypnotized volunteers who failed to confirm the investigators' predictions
- 49- I can be inferred from the passage that the connections in the brain across between regions responsible for separate senses _____.**
- 1) are set at birth
 - 2) cannot be reestablished once severed
 - 3) account for genius's eccentric ability
 - 4) are cut off in most people
- 50- The question posed in the last paragraph in the passage assumes that _____.**
- 1) the ability known as synaesthesia is one that can be nurtured in people
 - 2) research findings without foreseeable applications should be discarded
 - 3) research studies are cyclic in the sense that the solution to one problem leads to the emergence of a new topic for research
 - 4) breakthroughs in cognitive science should inform common teaching and learning paradigms in education
- 51- Which of the following best represents the relationship between the research results arrived at by Roi Cohen Kadosh and the general assertion made in the first paragraph?**
- 1) They challenge it by presenting an exception.
 - 2) They expand the scope of the topic in it.
 - 3) They refute it as a misconception.
 - 4) They simply support it.
- 52- The passage indicates that school children possessed of synaesthesia _____.**
- 1) should receive special treatment to make sure they are not educationally harmed by their gift
 - 2) need to take special tests that can offset the harmful potential of the distractions induced by their very same specific ability
 - 3) should take genetic tests and report the results to their teachers to forestall the formation of any educational elite
 - 4) are to be taught more through speaking and writing than reading and listening
- 53- What is the tone of the passage?**
- 1) Unconcerned
 - 2) Scholarly and impartial
 - 3) Defiant
 - 4) Skeptical and questioning

Passage 4

Discussions about ocean and global warming tend to focus on the threat of rising sea levels or the possibility that hotter tropical waters might spawn more frequent typhoons. But one also needs to remember that, in a fundamental sense, the oceans are important allies in the struggle against troubling climatic change. Of all the heat-trapping carbon dioxide that is released into the atmosphere every year from tailpipes and smokestacks, about a third goes into the sea, which scientists therefore recognize as an important “sink” for this gas.

The carbon dioxide dissolves in the shallow layers of the ocean, where, thankfully, it cannot contribute to warming the atmosphere. Much of the carbon transferred in this way is used by phytoplankton, the ubiquitous microscopic plants that grow near the surface of the water. After these short-lived organisms die, some of the carbon in their tissues sinks to great depths. Climatologists call this process the “biological pump” because it draws carbon out of the atmosphere and stores it deep in the sea. Naturally enough, some people have pondered whether this phenomenon could be artificially enhanced. This tactic would be the marine equivalent of planting more trees to isolate carbon in a form that does not contribute to greenhouse warming.

One researcher closely associated with this concept is the late John H. Martin of Moss Landing Marine Laboratories in California. Martin and his colleagues were aware that large oceanic regions contain high levels of nitrate (a normally scarce nutrient) but show low concentrations of the photosynthetic pigment chlorophyll. That combination was curious: with abundant nitrate to fertilize their growth, tiny marine plants should multiply rapidly, greening the sea with chlorophyll. Yet vast high-nitrate, low-chlorophyll areas can be found in the equatorial and northern Pacific and over large stretches of the southern oceans.

Martin and his co-workers knew that the growth of phytoplankton in these places was not limited by any of the major nutrients—nitrate, silicate or phosphate. They believed that the deficiency of a trace element, iron, was curbing the growth of phytoplankton, because experiments with cultures had shown that adding a dash of iron to water taken from these areas boosts its ability to support the growth of common types of phytoplankton.

They reasoned that this connection between iron and plant growth, if it indeed operated the same way in the ocean, would have profound consequences. For example, it could explain why carbon dioxide levels in the atmosphere were much lower during the last ice age: iron carried in dust blown off the cold, dry continents of the time would have fostered the growth of marine phytoplankton, which then acted to pump carbon from the atmosphere to the seafloor. When the continents became warmer and wetter at the end of the Pleistocene (roughly 10,000 years ago), the land gave off less dust to ocean-bound winds, robbing some marine phytoplankton of the iron needed for growth.

Although this argument was compelling, many other theories could also explain past changes in atmospheric carbon dioxide levels. To impress on some of his skeptical colleagues the importance of iron as a plant nutrient, Martin jokingly proclaimed in a lecture in 1988 that adding even modest amounts of iron in the right places could spur the growth of enough phytoplankton to draw much of the heat-absorbing carbon dioxide from the atmosphere. His often quoted jest “Give me a half a tanker of iron, and I’ll give you an ice age” foreshadowed more serious considerations of actually using this approach to help cool the planet.

54- The passage is primarily concerned with which of the following?

- 1) Tracing the impact of a new technology on an ongoing deleterious process
- 2) Evaluating two competing technologies to deal with the same phenomenon
- 3) Delineating the development of a new scientific procedure to handle a problem
- 4) Reinterpreting an event from an innovative but simple research-based perspective

55- The word "it" in line 29 refers to -----.

- 1) plant growth
- 2) connection
- 3) consequence
- 4) way

56- Which of the following best describes the function of paragraph 2 in relation to paragraph 1?

- 1) It reiterates the same position by resorting to the technique of "appeal to authority."
- 2) It qualifies the general assertion in paragraph 1 by including some opposing evidence.
- 3) It strives to dampen the optimism expressed in paragraph 1 by referring to some practical issues involved.
- 4) It attempts to shed more light on the main point posited in paragraph 1 by describing the related process that is involved.

57- According to the passage, the oceans are an important ally in the fight against global warming in that they _____.

- 1) absorb a large amount of CO₂, thus helping to alleviate global warming
- 2) are vast enough not to be affected by whatever amount of CO₂ that is dumped into them
- 3) make CO₂ vanish after they are drawn to the ocean floor and burned there
- 4) have already done so when the earth was during the last ice age

58- Where does in the passage does the write draw an analogy?

- 1) Lines 1-4
- 2) Lines 13-14
- 3) Line 18-21
- 4) Lines 29-31

59- The passage contains information that would answer which of the following questions?

- I. Why does the carbon dioxide dissolved in the shallow layers in the ocean not contribute to global warming?
- II. How did Martin and his co-workers come to know that nitrate, silicate or phosphate are not a detriment to the growth of phytoplankton?
- III. Why did Martin and his co-workers believe that deficiency of iron was linked to the growth of phytoplankton?
- IV. Is there a hypothetical answer to the question of why carbon dioxide levels in the atmosphere were much lower during the last ice age?

- 1) I and III only
- 2) I, II, and III only
- 3) I, III, IV, only
- 4) I and IV only

60- According to the passage, during the last ice age, _____

- 1) the connection between iron and plant growth in the oceans did not exist.
- 2) iron, the much needed nutrient for phytoplankton growth, was provided by dust winds laden with iron.
- 3) the amount of actual of plant life in the oceans sufficed to pump the carbon dioxide absorbed from the atmosphere.
- 4) the number of iron particles on the cold continents was great enough to nurture the phytoplankton , which in turn curbed the process of "biological pump".

Part A. Teaching Methodology

Directions: Select the best answer choice (1), (2), (3), or (4) to each of the following questions. Then mark your answer sheet.

- 61- Which of the following is less than the others related to cognitive psychology?
 1) Empiricism 2) Innateness 3) Intuition 4) Reinforcement
- 62- The claim to the effect that language is dependent on and springs from cognitive development is one basically supported by _____.
 1) Piaget 2) Chomsky 3) Vygotsky 4) Sapir and Wolf
- 63- Gouin's approach to language teaching was based on _____.
 1) rationalism 2) L1 acquisition 3) behaviorism 4) connectionism
- 64- Prator's hierarchy of difficulty in the CAH relates more to which of the following?
 I. Grammar
 II. Pronunciation
 III. Morphology
 1) I only 2) II only 3) I and III only 4) I and II only
- 65- According to the weak version of Contrastive Analysis, _____.
 1) linguistic difficulties can be more profitably explained a posteriori
 2) the more similar an item in L1 is to its counterpart in L2, the more difficult it is to learn it
 3) syntactic, semantic, or lexical interference is far less predictable than the other components of language
 4) when a linguistic pattern in L1 is minimally distinct in form and function from its equivalent in L2, the chances that confusion would occur in learning is greater
- 66- What stage of interlanguage development does the following description refer to?
"The learner has began to discern a system and to internalize certain rules. These rules may not be correct by target language standards, but they are nevertheless legitimate in the mind of the learner."
 1) Presystematic 2) Emergent 3) Systematic 4) Postsystematic
- 67- Textual competence is stated to be part of _____.
 1) language competence 2) pragmatic competence
 3) sociolinguistic competence 4) illocutionary competence
- 68- Which of the following is NOT a cognitive strategy?
 1) Imagery 2) Resourcing 3) Selective attention 4) Translation
- 69- Based on Oxford's taxonomy of leaning strategies, all of the following are "direct strategies" EXCEPT _____.
 1) remembering more effectively
 2) using all your cognitive processes
 3) organizing and evaluating your own learning
 4) compensating for missing knowledge
- 70- Which of the following pairs includes rhetorical functions only?
 1) Comparison and contrast 2) Definition and Causality
 3) Illustration and classification 4) Process and physical description

Part B: Language Testing

Directions: Choose the number of the best answer (1), (2), (3), or (4) to each question. Then mark your answer on your answer sheet.

81-The tests which tap the learners' ability to recognize the relationship between linguistic elements and extra-linguistic contexts in which the linguistic elements are appropriately used are _____ tests.

- 1) achievement 2) task-based 3) proficiency 4) pragmatic

82- Which of the following is NOT true about the C-Test?

- 1) Its scoring is subjective.
2) It is harder than a cloze passage to read.
3) It encourages the candidates to adopt a puzzle-solving strategy.
4) It incorporates a wider range of topics, styles, and levels of ability.

83- A test of writing which requires candidates to write the translation equivalents of 100 words in their own language _____ test of writing.

- 1) is both a reliable and a valid 2) is neither a reliable nor a valid
3) might be a valid but not a reliable 4) might be a reliable but not a valid

84-In _____ tests, each candidate's score is interpreted relative to the scores of all other candidates who take the test.

- 1) criterion-referenced 2) placement
3) norm-referenced 4) aptitude

85-Comparing the results of a test with a teacher's ratings obtained later suggests that we are interested in _____ validity of the test.

- 1) concurrent 2) predictive 3) construct 4) content

86-A traditional composition test in which candidates are required to write about a given topic is an example of a(n) _____ test.

- 1) indirect performance-referenced 2) direct performance-referenced
3) direct system-referenced 4) indirect system-referenced

87-Which of the following guidelines is NOT related to promoting test reliability?

- 1) Not allowing candidates too much freedom
2) Taking enough samples of behavior
3) Providing a detailed scoring key
4) Using direct testing techniques

88-The unitary trait hypothesis, which offers an indivisible view of language proficiency, is favored by testing specialists interested in _____ tests.

- 1) integrative 2) communicative 3) discrete-point 4) semi-direct

89- Which of the following does NOT represent authenticity in a given test?

- 1) Contextualization of test items
2) Ease of scoring the test items
3) Naturalness of the language used in the test
4) Resemblance of test items to real-world tasks

90- If the reliability and standard deviation of a test are 0.64 and 10 respectively, then the standard error of measurement would be _____.

- 1) 7 2) 4 3) 6 4) 8

91- If all the high-ability students in a class answer a test item correctly, and all the low-ability students fail to answer it correctly, the item discrimination index of this item would be _____.

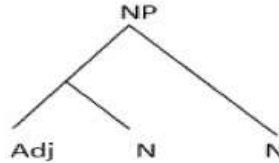

- 1) -1 2) 0 3) 0.5 4) +1

- 92- Suppose that a test has a standard deviation of 3 and a candidate scores 14 on this test. In this case, we can be 68 percent sure that this person's true score lies between _____.
- 1) 11-14 2) 11 -17 3) 14-17 4) 14-20
- 93- The method of scoring which requires a separate score for each of a number of aspects of a task is said to be _____.
- 1) holistic 2) analytic 3) independent 4) impressionistic
- 94- The following tip is most likely to be a useful guideline for developing effective _____ items. *Do not make a correct response on one item depend on another item being responded to correctly.*
- 1) grammar 2) vocabulary
3) writing 4) reading comprehension
- 95- Why do cloze tasks **NOT** qualify as cloze tests?
- 1) They violate the assumption of the naturalness of language.
2) They mostly appear in multiple-choice format.
3) They tend to focus on specific text types.
4) They include fewer blanks.
- 96- Which of the following dictation types is most suitable for children and preliterate adults?
- 1) Partial dictation 2) Dicto-comp
3) Elicited imitation 4) Dictation with competing noise
- 97- Portfolios are likely to promote all the following EXCEPT _____.
- 1) a continuous record of language development
2) students' experiences in and outside of school
3) student involvement in assessment
4) responsibility for self-assessment
- 98- To use KR-21 formula, one needs to know about the _____.
- 1) the mean score and the standard deviation
2) the number of items and the standard deviation
3) the number of items, the mean score, and the variance
4) the number of candidates, the mean score, and the variance
- 99- Why is the following test item poorly constructed?
Everyone was with John's performance on the test.
a. amazed b. satisfied c. discouraged d. ashamed
- 1) There is a grammatical clue which gives away the correct answer.
2) The options are not at the same level of difficulty.
3) There is more than one correct answer.
4) The distractors are very tricky.
- 100- The following item is an example of a _____ item.
Although he was too tired, he didn't stop work.
Despite
- 1) transformation 2) rearrangement 3) combination 4) pairing

Part C: Linguistics

Directions: Choose the number of the best answer (1), (2), (3), or (4) to each question. Then mark your answer on your answer sheet.

- 101- Which maxim is violated in the following conversation?
Polonius: What do you read, my Lord?
Hamlet: Words, words, words.
 1) Quantity 2) Quality 3) Relevance 4) Manner
- 102- Which of the following sentences contains the unmarked use of the adjective?
 1) How short is the movie?
